

TYPO3 Core - Bug #65809

Autocompletion fails in TypoScript-Editor

Description

Because of the bugfix [#25594](#) the autocompletion of typoscript-code fails, when I try to create new Objects.

For example, when I create a new TEXT-Object like this:

```
lib.field_test = TEXT
lib.field_test {
    value = This is a test
}
```

The section after the first "lib." will be interpreted wrong:

Bearbeiten setup.ts

```
1 lib.field_test = TEXT
2 lib.field_test {
3   value = This is a test
4 }
5
6 // Main-Navigation with Sub-Na
```

Before the bugfix [#25594](#) this worked correctly (see Screenshot 2) and when I remove the line 2603:

```
ch == "." ||
```

in typo3/sysext/t3editor/res/jslib/parse_typoscript/tokenizetyposcript.js, the problem is solved.

Hi Philipp, I wrongly removed screenshots thinking there were same. As such I remember one did not have proper indentation but don't understand how to reproduce. Could you please either describe again the problem with screenshots (make sure **NOT** to include spaces within filename since one cannot embed them using !filename.png! syntax) or using just pre tags.

Is problem in 6.2 solely or in master as well?

Hi Xavier

Thank you for your response. The problem still exist in TYPO3 6.2.12.

You can reproduce it like this:

1. Create new a file, for example "fileadmin/test.ts"
2. Open it with t3editor*
3. Write the test-code (do not copy&paste it from here)

```
// Test-Code
lib.field_test = TEXT
lib.field_test {
    value = This is a test
}
```

Wrong:

```
1 lib.field_test = TEXT
2 lib.field_test {
3     value = test
4 }
5
```

Okay:

```
1 lib.field_test = TEXT
2 lib.field_test {
3   value = test
4 }
5
```

PS: *You must add ".ts" in textfile_ext in TYPO3_CONF_VARS to edit ts-files:

```
$TYPO3_CONF_VARS['SYS']['textfile_ext'] = 'ts,txt,html,htm,css,tmpl,js,sql,xml, csv,php,php3,php4,php5,php6,phpsh,inc,phtml';
```

#12 - 2015-05-05 11:58 - Bernd Wilke

you can test it also with a simple typoscript-template record, editing the setup:

```
lib.mytest = COA
lib.mytest {
    // indentation not recognized
    10 = TEXT
    10 {
        // indentation recognized
        value = dummy
    }
    20 = TEXT
    20.value = dummy2
    20.stdWrap {
        // indentation not recognized
        wrap = ()
    }
}
```

marking all and pressing the tab key will result in all lines starting at the beginning (no indentation) except the two lines inside 10

- Sprint Focus set to Stabilization Sprint

#14 - 2015-05-05 14:30 - Mathias Schreiber

- Target version changed from next-patchlevel to 6.2.13

#15 - 2015-05-25 00:59 - Markus Klein

- Status changed from Needs Feedback to Accepted

#16 - 2015-05-26 17:11 - Mathias Schreiber

- Sprint Focus deleted (Stabilization Sprint)

#17 - 2015-06-10 12:25 - Alexander Opitz

- Target version changed from 6.2.13 to 6.2.14

#18 - 2015-07-07 14:44 - Alexander Opitz

- Target version changed from 6.2.14 to 6.2.15

- Sprint Focus set to Stabilization Sprint

As it is marked as regression and already was on stab board, I'll readd it there for 6.2.15

#19 - 2015-09-08 13:42 - Alexander Opitz

- Target version changed from 6.2.15 to 6.2.16

#20 - 2015-12-06 15:01 - Benni Mack

- Assignee deleted (Benni Mack)

#21 - 2015-12-15 00:17 - Markus Klein

- Target version changed from 6.2.16 to Candidate for patchlevel

Please re-schedule for the next release once available.

#22 - 2017-07-21 11:28 - Riccardo De Contardi

- Related to Task #81885: Remove TypoScript syntax highlighting and code completion added

#23 - 2017-07-21 11:35 - Riccardo De Contardi

- Status changed from Accepted to Closed

- Target version deleted (Candidate for patchlevel)

Considering the issue [#81885](#), I close this one for now.

Custom adoptions to codemirror is getting dropped in version 9 and no further changes will be done for TYPO3 CMS 7.x & TYPO3 CMS 8.x.

If this decision is wrong, please reopen or let me know and I will do.
