#### Description

Make sure that the new Extbase plugin contains all functionality and no open issues anymore. So we can depreciate pi-based plugin later.

## History

---

### #1 - 2015-03-18 17:07 - Tymoteusz Motylewski

- Category set to Indexed Search

### #2 - 2015-06-15 17:08 - Benni Mack

- Target version changed from 7.2 (Frontend) to 7.4 (Backend)

### #3 - 2015-06-29 21:38 - Gerhard Rupp

Bug [#38767](#) still exists in the Extbase based version of indexed search

### #4 - 2015-06-29 22:05 - Gerhard Rupp

Duplicate 'AND' in IndexSearchRepository.php

Line 562 and 627 both add a 'AND' string so the final query contains 'AND AND' and gets invalid.

The pi-based version of indexed search does not contain 'AND' in function execFinalQuery (SearchFormController.php line 1108)

### #5 - 2015-06-29 22:44 - Gerhard Rupp

There is something wrong with the implode function in statement

```
$wordSel = '(' . implode(' OR ', $this->wSelClauses) . ') AND ';
```

in line 614 in IndexSearchRepository.php

Implode returns double ORs ('OR OR'). Therefore the query gets invalid.

### #6 - 2015-06-29 22:47 - Gerhard Rupp

There are only search results for the first item in defaultFreeIndexUidList.

Other items return "no result" even if there are some.

Thanks for reporting Gerhard. I have opened a new ticket for your findings. <https://forge.typo3.org/issues/67843> Can you please comment there which TYPO3 version you're using?

Thanks

In line 17 in partial Searchresult.html the viewhelper f:format.raw should be used instead of f:format.html.

Otherwise {row.path} gets wrapped by a "<p class="bodytext">

Same for {row.description} - otherwise <strong class="tx-indexedsearch-redMarkup"> gets escaped.

### #9 - 2015-07-01 18:28 - Gerhard Rupp

The labels in locallang.xml contain dots following a number. This prohibits the change of texts via TS.

The labels should be changed so that they contain underscores instead of dots (as it is in pi-based version).

An example how to change the texts should be included in the manual.

For exapmle:

pi-based: "opt\_freeIndexUid\_header\_0"

Extbased: "indexingConfigurationHeader.0"

Btw: Translating "result.noResult" via TS is no problem

### #10 - 2015-07-13 21:37 - Tymoteusz Motylewski

@Gerhard, please open new tickets for each separate problem.

About the dots in language keys, can't you escape the dot in the TS?

e.g. result\.\noResult ?

see <http://docs.typo3.org/typo3cms/TyposcriptSyntaxReference/Syntax/TypoScriptSyntax/Index.html>

If it doesnt work for you please open new ticket.
