Description

Hi there

There is an issue when using aliased simple (target) types (int/bool/double) in PHDoc. During mapping it correctly identifies them as integer/boolean/float but fails to map them, because there is no type handling definition for int etc.

This can be remedied by calling `\TYPO3\CMS\Extbase\Utility\TypeHandlingUtility::normalizeType()` in the PropertyMapper (see attached patch).

Found in 6.2.9, still relevant in 6.2.11.

Kind regards
Nils

Hi, meanwhile this has been resolved with <https://forge.typo3.org/issues/67044>
Is included in latest 6.2 release.
