Description	
Since 6.2 the following code in t3editor does not indent, since lib.logo contains a dot:	
<pre>lib.logo = TEXT lib.logo { value = foo }</pre>

History

#1 - 2015-04-28 10:54 - Malte Koitka

Can confirm this for 6.2.12. It should be the same issue as [#65809](#).

#2 - 2015-07-28 19:22 - Andreas Fernandez

- Target version set to 7 LTS

This seems to be a bug in the TypoScript lexer used by the editor. I didn't understand all of it's code yet, but I like to tackle it soon.

#3 - 2015-07-28 19:23 - Andreas Fernandez

- Status changed from New to Accepted

#4 - 2015-10-08 20:30 - Benni Mack

- Target version changed from 7 LTS to 8 LTS

I consider updating the library here, which might solve a lot of other issues as well.

#5 - 2017-05-04 17:48 - Benni Mack

- Target version changed from 8 LTS to Candidate for patchlevel

#6 - 2017-06-12 14:07 - Bernd Wilke

#8 - 2017-06-12 14:07 - Bernd Wilke

- Has duplicate Bug #81546: Indentation in t3editor is wrong added

#9 - 2017-07-21 11:28 - Riccardo De Contardi

- Related to Task #81885: Remove TypoScript syntax highlighting and code completion added

#10 - 2017-07-21 11:36 - Riccardo De Contardi

- Status changed from Accepted to Closed

- Target version deleted (Candidate for patchlevel)

Considering the issue [#81885](#), I close this one for now.

Custom adoptions to codemirror is getting dropped in version 9 and no further changes will be done for TYPO3 CMS 7.x & TYPO3 CMS 8.x.

If this decision is wrong, please reopen or let me know and I will do.
