Description			
The patch https://review.typo3.org/#/c/38433/ introduced a problem with flexform section: New sections can't get added. The interface works but when saving they do not get stored in the flexform.			
If required I could write a functional unit test for this issue.

Hmm, unable to reproduce: ext:styleguide has a section / container example at flex -> flex 3 -> tab section and adding new containers works there. Could you add an example (maybe to this extension) to show your usecase?
