

TYPO3.Flow - Bug #6680

Make FLOW3 open_basedir aware

2010-03-03 18:20 - Thomas Fritz

Status:	Closed	Start date:	2010-03-03
Priority:	Must have	Due date:

Target version:	1.0 alpha 8	Complexity:	
PHP Version:			
Has patch:			

Description

FLOW3 uses the Default Temporary Path for the Operating Systems. In Linux '/tmp' is used for different operations. This behaviour triggers an error on environments where a open_basedir ini setting was set. Perhaps it is better to use a Path within the FLOW3 Root Path in 'Data/Temporary' or determine the temporary path out of upload_tmp_dir or session_save_path ini setting.

The Environment class provides a method to get the temporary directory. That by default uses the Data/Temporary folder. The use of /tmp is a fallback. So, we try to do what you want, but if that doesn't work, we need to fall back to something. Make sure you have the permissions set correctly.
