#### Description

Thank you for resolving issue: <https://forge.typo3.org/issues/65117>

But there is a new Problem:

- TYPO3 6.2.12
- Installed Templavoila 1.9.0
- Load actual Extensionlist from TER
- Upgrade Templavoila

Now the Lightbox with the changelog appears. There it shows the infos to all the TV-versions for TYPO3 6.2 (the TV versions for TYPO3 7.x are not shown - perfect !!!).

But when you make the TV-upgrade, the newest version of TV (2.0.3 for TYPO3 7.x) is installed and the 6.2 System crashes :(

Quick solution for Integrators with this problem:

- delete folder /typo3conf/ext/templavoila
- download newest Templavoila 1.9.x from typo3.org
- unzip it an upload is to /typo3conf/ext/templavoila

#### History

##### #1 - 2015-05-08 19:15 - Christian Kuhn

- Target version changed from next-patchlevel to 6.2.13

##### #2 - 2015-05-09 17:02 - Markus Klein

- Sprint Focus set to Stabilization Sprint

##### #3 - 2015-05-12 14:05 - Thomas Oliver Moll

Sorry if this is redundant, but this issue is still listed as "new", and not Accepted  
Can confirm: This problem exists in 6.2.12

##### #4 - 2015-05-22 10:49 - Xavier Perseguers

- Status changed from New to Accepted

##### #5 - 2015-05-25 22:55 - Alexander Opitz

Hi,

excuse the long time it takes to respond. I'd used TemplaVoila to fix [#65117](#) and tested with it and it worked. But maybe something slept through, will try to have a look into it this week.

Thanks for reporting.

##### #6 - 2015-05-26 18:31 - Alexander Opitz

- Status changed from Accepted to In Progress

**#7 - 2015-05-26 18:54 - Alexander Opitz**

- Status changed from In Progress to Resolved

The code part in question (which does the update to the corresponding version) was accidentally missing while backporting to the 6.2 branch.

But the code part was backported while fixing [#65484](#) by review <https://review.typo3.org/#/c/39603/> so this should be fixed in 6.2.13.
