

TYPO3 Core - Bug #67044

Normalize Type int to integer doesn't work in DTOs

Description

I walk across a bug with the PropertyMapper when i declare a property as int instead of integer in a DTO Model. The error message says as follows:

#1297759968: Exception while property mapping at property path "confirmation":No converter found which can be used to convert from "string" to "int".

I found an issue report and a fix in the TYPO3 FLOW Bugtracker under: <https://forge.typo3.org/issues/47054>

Maybe this fix has not been ported to extbase yet.

After i changed the declaration from int to integer, everything works as expected.

To reproduce this, simply add an action in a controller which expects a DTO as parameter and let it validate this. Add a property with declaration int to the DTO and submit it to the created action with an integer value for this property.

I encountered this with TYPO3 6.2.13 from github TYPO3_6-2 branch.

[BUGFIX] PropertyMapper now normalizes simple types

This fixes a bug where the property mapper was unable to find a valid typeconverter for properties annotated with int or bool.

Resolves: #67044

Releases: master,6.2
