

## TYPO3 Core - Bug #67100

### ToolbarInterfaces are not compatible

#### Description

Hello Core-Team,

after requesting /typo3 directory I get following error message:

```
Fatal error: Declaration of TYPO3\CMS\Workspaces\ExtDirect\WorkspaceSelectorToolbarItem::__construct() must be compatible with that of TYPO3\CMS\Backend\Toolbar\ToolbarItemHookInterface::__construct() in /kunden/.../typo3cms/typo3_src-6.2.12/typo3/sysex/typo3/Workspaces/Classes/ExtDirect/WorkspaceSelectorToolbarItem.php on line 28
```

I have added a & (reference) to the declaration to the Interface, but now I get following error message:

```
Fatal error: Declaration of TYPO3\CMS\Backend\Toolbar\ShortcutToolbarItem::__construct() must be compatible with that of TYPO3\CMS\Backend\Toolbar\ToolbarItemHookInterface::__construct() in /kunden/.../typo3cms/typo3_src-6.2.12/typo3/sysex/backend/Classes/Toolbar/ShortcutToolbarItem.php on line 27
```

So it would be good to sanitize all these ToolbarClasses to be compatible with this Interface.

What is the best way? Add or remove the & from Interface?

Same problem with PHP 5.5.14

Stefan

Argh! What's that? On my local machine everything works and all classes have the & set. So the customer must have modified the source code. Oh dear!!!
