TYPO3 Core - Bug #67528

Copying a large set of high-res images to clipboard crashes server

2015-06-16 20:42 - Philipp Gampe

Description

Since [47fa57382d7a727f46126e499e82281784cae18a](#) (https://review.typo3.org/#/c/40307/) thumbnails are show by default in the clipboard.
This crashes the server (the PHP process) if you copy many images (default 40) with high-resolution into the clipboard without having display thumbnails set.

Hey Philipp,

crashing would mean - a "memory_limit" issue? Can you add some more details (e.g. attach such an image, memory limit and max_execution_time of the server, PHP version)?

sorry for the late reply.

#5 - 2020-10-26 16:19 - Sybille Peters

I could not reproduce this. Used:

System

- TYPO3 11-dev (master)
- memory_limit = 256M
- max_execution_time = 240
- PHP 7.4

Reproduce

1. Uploaded several files of resolution 1920x1080.
2. Switched off thumbnail preview in filelist
3. removed all processed files via Maintenance > Remove Temporary Assets
4. copied 40 files to clipboard

Seems to work fine. Copying 40 more to clipboard worked too.

I am closing. Please reopen with more information about error (exception message and stacktrace, TYPO3 version, php.ini settings, sample image etc.) if problem still occurs.
