#### Description

Streamline rendering of FlashMessages to the same output the view helper creates by default currently.

This makes usage of HTML in flash messages not possible any more when `FlashMessageQueue::renderFlashMessages()` is used, because all HTML entities will now be properly HTML encoded.

[!!!][TASK] Cleanup Flash message rendering in FlashMessageQueue

Streamline rendering of FlashMessages to the same output the view helper creates by default currently.

This makes usage of HTML in flash messages not possible any more when `FlashMessageQueue::renderFlashMessages()` is used, because all HTML entities will now be properly HTML encoded.

Also adapt DocumentTemplate to use the new rendering and remove the deprecated div wrapper with id.
