Description			
<p>By adding a new hook to the localize function, translateToMessage processing we would be able to use external translation services and speed-up translation of the content and even add a custom transliteration functions that would handle various content transformations. I've already created an extension that uses this successfully.</p> <p>Attaching a hook from extension would be as easy as (ext_localconf.php) :</p> <pre>\$GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['t3lib/class.t3lib_tceMain.php']['processTranslateToClass'][] = 'EXT:yourextension/class.tx_yourextension_tceMain.php:tx_yourextension_tceMain'</pre> <p>and then in the extension class:</p> <pre>class tx_yourextension_tceMain { function processTranslateTo_copyAction(&\$content, \$lang) { // Do something with content (translate, transliterate etc) } }</pre> <p>Patch is attached.</p>

Revision 8fe95973 - 2016-12-07 13:26 - Goran Medakovic

[FEATURE] Add a hook to DataHandler - localize - translateToMessage

Passing entire \$langRec variable instead of just the title.

Resolves: #67909

Releases: master
