Description

In older 7 versions packages like that were also stored in the packageState.php file:

```
'symfony.yaml' =>
  array (
    'manifestPath' => 'Symfony/Component/Yaml/',
    'composerName' => 'symfony/yaml',
    'state' => 'inactive',
    'packagePath' => 'Packages/Libraries/symfony/yaml/',
    'classesPath' => 'Classes/',
    'suggestions' =>
      array (
      ),
  ),
```

which now Package to throw Exception\InvalidPackageManifestException

Unfortunately PackageManager doesn't catch this exception, which result in Fatal error (probably error handler is not yet configured).

[BUGFIX] Catch InvalidPackageManifestException in PackageManager

Prevents TYPO3 from going fatal when ext_emconf.php for some package is missing.

Releases: master

Resolves: #68082
