!!!![TASK] Remove magic quote handling from \$\_GET / \$\_POST

The magic quote functionality was removed with PHP 5.4.0. In previous PHP versions this was a switch to turn on/off adding slashes to the \$\_GET and \$\_POST superglobals.

TYPO3 however was always adding slashes at every request and using GeneralUtility::\_GP() etc. to remove the slashes again.

As the PHP functionality is now removed, meaning there are no slashes added at all, TYPO3 can now use the non-slashed data inside the superglobals directly.

Resolves: #68128

Releases: master
