**Description**

The typo3/ajax.php entrypoint is removed in favor of checking for ajaxID in all backend requests inside the Backend Application.

The request object from the server is now enhanced with the information inside the application which type is now called.

In this course, the GeneralUtility::isInternalRequestType() is extended to return true if no request type constant is set due to early calls to GeneralUtility methods when building the ServerRequest object with a Uri object.

Resolves: #68141

Revisions:

**Revision de6aa426 - 2015-07-15 11:34 - Benni Mack**

[TASK] Move Backend AJAX Calls to index.php

The typo3/ajax.php entrypoint is removed in favor of checking for ajaxID in all backend requests inside the Backend Application.

The request object from the server is now enhanced with the information inside the application which type is now called.

In this course, the GeneralUtility::isInternalRequestType() is extended to return true if no request type constant is set due to early calls to GeneralUtility methods when building the ServerRequest object with a Uri object.
