[BUGFIX] t3editor: Add properties from supertypes to autocomplete

Fix the condition that checks if a TypoScript property of the supertype needs to be added to the current node in the tree.

Resolves: #68440

Releases: master

- Status changed from New to Rejected

this is not about functionality, but missing autocomplete of the t3editor!

can you try latest master and hard-hard flush caches in your browser as well as delete generated JS from typo3temp?
This did it for me.

If this fixes the issue, just close this one

#5 - 2015-07-27 08:27 - Stefan Froemken

It still does not work.

I have cleared all caches in Installtool two times
I have deleted typo3temp completely
I have tested it in FF, Chrome and Safari
I have opened the page with Safari the first time, so there are no previous browser caches
I have activated the browser debug console and right clicked on refresh in Chrome to clear all browser caches for Chrome
I have started a private/inkognito window in Chrome
I have cleared all browser caches in FF

...but the problem is still there and reproduceable in all 3 tested browsers.

Give me a hint how and where I can start to debug that.

Stefan
