Description			
Hello,			
maybe we can give some love to the TS-ObjectBrowser. I mean the view, where you can assign values to selected TS-ObjectPath. The Textfields are too small in their height or the Confirmationbuttons are too height. Further the Buttons have no margin assigned. So they are glued directly to the input fields.

[BUGFIX] Improve styling of TS-Objectbrowsers edit view

Bootstrap classes are applied to the form and the input fields of the edit view in the objectbrowser to fit the rest of the backend styling. Additionally two unstyled a tags are transformed to buttons.
