

TYPO3 Core - Bug #68672

Epic # 86307 (New): Extbase allows to fetch deleted/hidden records (respects ignoreEnableFields)

setIgnoreEnableFields() should be inherited to language overlays

2015-07-31 14:12 - Martin R. Krause

Description			
Using the setIgnoreEnableFields() for query settings in an extbase repository fails, when the record gets a language overlay. It should be inherited to the overlay query.			
The usage of the enable fields for the query of the language overlay is pretty much hardcoded in			
<code>typo3_src-6.2.12/typo3/sysext/frontend/Classes/Page/PageRepository.php:431</code>			
In addition the logic of the language overlay for Extbase record is inconsistent:			
E.g.: Providing that starttime has l10n_mode "mergelfNotBlank" (which is default), a translation of a record can be shown, even if its l10_parent is still hidden – only the enable fields of the translated record matter (which is OK). The other way around, requesting the record from an Extbase repository does not work, as both records (original and translation) need to allow for display of the record in order to show the translation.

Revision 8d4fe802 - 2018-09-20 15:39 - Tymoteusz Motylewski

[TASK] Provide more tests for Extbase rendering in languages

Some tests are just documenting current, buggy behavior.
So once bugs are fixed assertions needs to be updated.
See inline comments for details (and list of related issues below).
