<b>Description</b> Register the icon "actions-reference-file" and replace the iconUtility calls for that icon with the IconFactory.  The icon actions-reference-file is still a image icon. Need to wait for the SVG!

[TASK] Replace icon by IconFactory: actions-reference-file

As the icon was missing even before this patch and the function is only be called in the case of an import from TYPO3 4.5 I took the liberty to just replace it with the reference-hard icon, to which it is connected.

[#68973](#) and [#68974](#) were identical, but the issue for „actions-reference-file“ was missing.

##### #3 - 2015-09-01 20:19 - Morton Jonuschat

- Status changed from *New* to *Needs Feedback*

Seem the icon file and the associated CSS is missing. The icon is referenced in EXT:impexp

##### #4 - 2015-09-07 10:23 - Frank Naegler

I think we should simple remove it.

**#5 - 2015-09-12 13:21 - Jan Helke**

The only way to test that is to copy  
typo3/sysex/impexp/Tests/Functional/ImportFromVersionFourDotFive/PagesAndTtContentWithRteImagesAndFileLink/ImportExportXml/pages-and-tt  
content-with-rte-image-n-file-link.xml to fileadmin/user\_upload/\_temp\_/importexport and try to import that.  
Than the icon in front of " RTEmagicP\_typo3\_image2.jpg (Original)" is the icon in question. Yes, it is already missing. But as I would not remove that,  
because it might be possible that someone will import old 4.5 stuff, I will push a patch for that.
