

TYPO3.Flow - Bug #6911

SQL error when using setOrderings() without matching()

2010-03-18 15:36 - Peter Beernink

Status:	Resolved	Start date:	2010-03-18
Priority:	Must have	Due date:	
Assignee:	Karsten Dambekalns	% Done:	100%
Category:	Persistence	Estimated time:	1.00 hour
Target version:	1.0 alpha 8	Complexity:	
PHP Version:			
Has patch:			

Description

Using setOrderings() on a query object without the use of matching() results in the following SQL error.

Example:

```
$query = $this->createQuery();  
return $query->setOrderings(array('lastname' => \F3\FLOW3\Persistence\QueryInterface::ORDER_ASCENDING))->execute();
```

Will give the following SQL error:

```
SQLSTATE[HY000]: General error: 1 no such column: d.parent
```

When adding a \$query->matching(), it works as expected.

Tested on alpha7 using the default SQLite.
