Description

The InformationStatus Enumeration provides a mapStatusToInt() method. The method expects a string but should expect an enum of itself.

Revision 822d1e84 - 2015-09-25 07:54 - Sascha Egerer

[!!!][BUGFIX] Fix wrong usage of Enum in InformationStatus Enum itself

The Enumeration implementation of InformationStatus provides a mapStatusToInt() method that must expect a InformationStatus instance as parameter instead of a string.

The method mapStatusToInt() has also been replaced by "isGreaterThan" as a comparison method fits better into the enumeration usage.

This change is breaking but should not really break anything as it was introduced in 7.4 and only used at one place in the core.
