[BUGFIX] Show folder icons in ElementBrowser file tree

The folder icons are now also shown in the ElementBrowser file tree, but without context-menu. As the icon link handling provided by the general FolderTree wrapIcon function does not match in ElementBrowser mode, an own implementation of this function is introduced in ElementBrowserFolderTreeView.

History

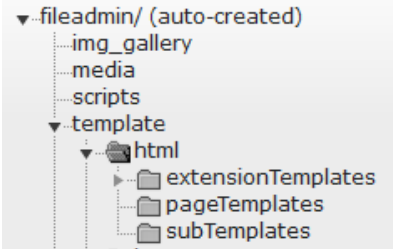

#1 - 2015-09-15 10:26 - Stephan Großberndt

This was not broken by any recent patch, neither 7.4, 6.2 show these icons. Last version where they were shown is 6.0. (I do not have a 6.1 available to see if it worked there)

6.2.14 LTS shows the icons, 6.2.15 LTS is without icons. If you close a subtree and open it again the icons for the subtree are shown.

As far as I tested it on several installations, it seems to be OK in 6.2.14 and is now "broken" in 6.2.15.
