Description	
Use case:	
<ul style="list-style-type: none">- a ftp storage (https://github.com/adgrafik/fal_ftp) marked as not writable with processing folder 1:/_processed_/FTP- Text with image content record with an image from ftp storage	
Problem:	
<ul style="list-style-type: none">- image isn't shown (neither in frontend nor backend)	
Analysis:	
<ul style="list-style-type: none">- for frontend processing the driver creates a tempfile as the file on the other server isn't available for processing- this is as defined in the function description of the DriverInterface- the processing task tries to process (crop/mask) the image and confess there isn't any change needed- the task returns NULL and the original file is used- the processed file is saved with wrong information and the temp file is lost

Revision e325d476 - 2015-09-25 19:59 - Nicole Cordes

[BUGFIX] Use correct storage when getting public url of processed file

If the processed file object is marked configured to use the original file we have to ensure the right storage is used when creating the publicUrl.

Resolves: #69833

Releases: master, 6.2
