<b>Description</b>	
<p>Hallo Core-Team,</p> <p>I just have installed TYPO3 that way:</p> <pre>composer create-project typo3/cms-base-distribution typo3test dev-master</pre> <p>Then I have added one page, assigned a site-template to that page and included CSC. Nothing more, no additional extensions.</p> <p>If I edit TS over template module I can't save my changes. I have changed the page.10-part to page.10 &lt; styles.content.get and pressed save. The old TS was displayed again. Same with Save and close. Interesting: CMD+S works.</p> <p>If I edit my TS over list module everything works like expected.</p> <p>I have opened my developer toolbar of the browser and I can told you, that the old (unchanged) content will be send via POST and not my changed values.</p> <p>Stefan</p>
