do you see a possibility to remove all these spaces and tabs out of the rendered HTML?

[FEATURE] Spaceless ViewHelper

Removes redundant spaces between HTML tags while preserving the whitespace that may be inside HTML tags. Trims the final result before output.

Heavily inspired by Twig's corresponding node type.

```
<f:spaceless> <div> <div> <div>text text</div> </div> </div> </f:spaceless>
<output>
<div><div><div>text
```

```
text</div></div></div>
</output>
```

I am in favor of having a solution for that as well. This is core Fluid problem. Maybe claus knows some help on that.
