<b>Description</b>			
The FormDataTraverser class should be converted into a Data Provider that makes use of the processed data already available as well as using the FormEngine to resolve any relations.

[TASK] FormEngine: Replace placeholder resolving with a data provider

Resolving of placeholder for field types text and input has been moved from the element rendering into the form data providers. The data provider approach allows reuse of existing providers and data groups and reduces the amount of database queries by having access to previously parsed data.

Resolves: #70370
