Revert "[BUGFIX] Admin users should ignore user mounts"

This patch was incomplete:

- TCA still contains mounts for admins
- Group mounts are still respected

Besides that, there are options in the user record to disable that behavior.

Besides that, it is the concept of mounts, that it is useful to see submounts of a global mount.

This reverts commit f262ddef067d3450db05491d39c762f39a9fb826.

Resolves: #70493

Reverts: #57587

Releases: master
