#### Description

Hi

I've found an issue in the content element "shortcut" (reference). If I change the value of the original content element (Flexform) the values of the referenced element will not be updated. (see attached screenshot)

Frontend is everything fine.

#### History

- Status changed from New to Needs Feedback

You're using a non-core extension for content nesting here, this is not a Core issue. Please report the problem at with the extension you use.

##### #2 - 2015-10-13 11:58 - Christian Hünninger

Hi Markus,

Yes you are right. I've tested this with the TYPO3 content elements and it works fine.

Sorry - was my fault :)

You can close the ticket.

THNQ,  
Christian
