

Editorial Team - Bug #70704

Migrate old APIs to new ones

2015-10-14 17:07 - Daniel Siepmann

Status:	Closed	Start date:	2015-10-14
Priority:	Should have	Due date:	
Assignee:	Daniel Siepmann	% Done:	0%
Category:	Backend	Estimated time:	0.00 hour
Target version:	t3o_going_responsive		
Description			
On some places old APIs were used, which do not exist anymore, e.g. calls like <code>Tx_Extbase_UTILITY_Cache::clearPageCache(\$pages)</code> ; which should now be			
<pre>\TYPO3\CMS\Core\Utility\GeneralUtility::makeInstance('\TYPO3\CMS\Extbase\Object\objectManager') ->get('\TYPO3\CMS\Extbase\Service\CacheService') ->clearPageCache(\$pages);</pre>			
This can be migrated in one step to ease migration of extensions.

History

#1 - 2015-10-14 17:24 - Daniel Siepmann

Take a look at the existing branch and commits, to find out which calls were migrated yet.

Please add all API call changes you detect in this branch and though out the `typo3conf/ext` folder. This way not everybody needs to get into the same change.
