Target version:		Complexity:	easy
PHP Version:		Sprint Focus:	
Tags:			
Description			
Adding a placeholder attribute to the FormEngine would improve user experience by giving the editor some hints about possible values			
Example:			
<pre>'background_color' => array('label' => 'label', 'config' => array('type' => 'input', 'eval' => 'trim', 'placeholder' => '#0000ff'),),</pre>			
would result in:			
<pre><input name="background_color" placeholder="#0000ff" /></pre>
