Description			
Is it possible to add a signal in makeSearchString so an extension can change the behaviour of the backend search?			
Possible use case for fe_users: Search term "Lisa Mair" where Lisa is stored in the first_name column and Mair in the last_name column. The current search query won't find this entry (Since it searches for "Lisa Mair" in first_name and "Lisa Mair" in last_name). With the new signal an extension could add something like:			
<pre>OR MATCH(first_name,last_name) AGAINST('+Lisa* +Mair*' IN BOOLEAN MODE)</pre>

[FEATURE] Add constraint hook in DatabaseRecordList->makeSearchString

A newly introduced hook in DatabaseRecordList->makeSearchString allows to modify the constraints which are applied to the search string.

Resolves: #71911

Releases: master
