Description As they are always set to the same option, this options can be merged. A new option "CharsetConverter" should be used to define the parameters directly. This is also to get rid of t3lib_cs_*

[FEATURE] Auto-detect charset conversion

The CharsetConverter previously had to be configured to detect if mbstring or iconv or TYPO3's homemade code via the \$TYPO3_CONF_VARS options.

Since CharsetConverter is now a singleton, the check which conversion strategy should be chosen is now done during runtime once every request, where mbstring takes precedence over iconv.

The feature detection in the Install Tool is removed.

Resolves: #72337

Releases: master
