[!!!][TASK] Remove GraphicalFunctions->nativeCharset

GraphicalFunctions contains an option called "nativeCharset" which is set to utf8 at all times, changing encoding functionality to use csConv.

This can be simplified by always using csConv.

The functions "singleChars" and "recodeString" are then obsolete and completely removed, as well as the functionality to set "nativeCharset" to something else than utf-8.

Resolves: #72338

Releases: master
