Description			
This BUGFIX : https://review.typo3.org/45401 works. But in my flexform inline, I set <maxItems>2</maxItems> and <minItems>2</minItems>. When I put 2 pictures it's OK, I save, the buttons "add image" and "upload" are masked (because i have the maxItem). When I delete one ore more pictures it's work but both buttons are not showed again so i can't load new pictures. Thank's for your help. Regards, Nguyen Geoffrey

This issue still persists in the backend forms. I am currently using the typo3 version 7.6.15. I have checked the javascript file mentioned in the changeset, every change mentioned there has been already updated. But bug remains unsolved.
