Revision 270920ce - 2016-01-12 09:46 - Benni Mack

[TASK] Move non-public files to typo3temp/var/

Add a subdirectory typo3temp/var/ (by default) which contains all files which should never be accessible for the web user.

In the future, this option should be configurable so it can be put outside of the document root (e.g. via an environment variable).

Resolves: #72479

Revision d66947a6 - 2016-01-28 07:35 - Helmut Hummel

[BUGFIX] Move all typo3temp files below typo3temp/var or assets

The introduction of typo3temp/var and typo3temp/assets missed essential changes.

- Files generated by tests
- Install Tool cleared wrong directory
- Some paths were only changed partially
- Some paths were changed to the public dir, but should in fact be private
- Some paths have been completely forgotten to be changed

Besides that, the introduction of new subfolder in typo3temp, we need to allow arbitrary number of subfolders and remove the limitation of two in GeneralUtility::writeFileToTypo3tempDir
