[TASK] Move publicly accessible files to typo3temp/assets/

New folder structure is given which contains all files (images, css, js) which need to be accessible for the web client.

Also, the folders have been named properly:
- typo3temp/pics/ is now typo3temp/images/
- The typo3temp/temp/ directory which was previously used for storing temporary images when doing complex image masking etc. is now named typo3temp/assets/transient/ which also contains some volatile files when creating online media records before FAL processes the file.
