| Story # 57377: Additional improvements for impexp                                      |                             |                        | Closed     |
| Feature # 57378: Cli support for Import/Export   |                             |                        | Closed     |
| Task # 57379: Support for files separated from the t3d file                            |                             |                        | Closed     |
| Task # 57380: Cleanup impexp   |                             |                        | Closed     |
| Task # 83596: impexp: Remove "Max file size" restriction                               |                             |                        | Closed     |
| Task # 83597: impexp: Use XML as default export format                                 |                             |                        | Closed     |
| Task # 58801: Improve logging of initial t3d import errors                             |                             |                        | Closed     |
| Task # 59731: Cleanup created files in functional test in impexp                       |                             |                        | Closed     |
| Task # 58693: Ignore sys_file_reference records pointing to missing files on import    |                             |                        | Closed     |
| Feature # 19151: impexp module should be accessible through functions module           |                             |                        | Closed     |
| Feature # 19157: impexp could have an option to exclude all hidden records             |                             |                        | Closed     |
| Feature # 58491: Impexp lacks support of keeping or setting new uids of lost relations |                             |                        | New        |
| Bug # 62081: TCA not updated before t3d/xml file will be imported                      |                             |                        | Closed     |
| Bug # 67188: Wrong FAL References after Import   |                             |                        | Closed     |
| Feature # 68202: Add option to keep user/group permissions when importing pages        |                             |                        | New        |
| Bug # 72207: Files missing in import/export  |                             |                        | Closed     |
| Bug # 72777: Import success message although import was prevented                      |                             |                        | New        |
| Bug # 72962: Avoid garbage upon failed import  |                             |                        | New        |
| Bug # 72968: Missing files during import cause abort                                   |                             |                        | New        |
| Bug # 73157: Importing non-compressed t3d files does not work anymore                  |                             |                        | Closed     |
| Bug # 73158: Wrong casing in FAL function name call                                    |                             |                        | Closed     |
| Bug # 73182: Import of localized content fails, content loses language id              |                             |                        | Closed     |
| Bug # 73443: Backend-layouts not properly mapped upon import                           |                             |                        | New        |
| Bug # 75331: Impexp does not care about filemounts                                     |                             |                        | Closed     |
| Bug # 75882: t3d import gives exception: File "" does not exist                        |                             |                        | Closed     |
| Bug # 80992: Import: page imported but no content.                                     |                             |                        | New        |
| Bug # 82301: Relationship between tt_address and sys_category records broken on import |                             |                        | New        |
| Bug # 83599: impexp: File upload in import broken                                      |                             |                        | Closed     |
| Bug # 84041: Existing file references are modified after export/import                 |                             |                        | Accepted   |
| Story # 85430: Improve usability of impexp and add documentation                       |                             |                        | New        |

### History

#1 - 2016-01-08 11:20 - Anja Leichsenring

- Sprint Focus set to On Location Sprint

**#2 - 2016-05-09 15:21 - Nicole Cordes**

- *Sprint Focus deleted (On Location Sprint)*

**#3 - 2017-04-01 14:08 - Benni Mack**

- *Target version changed from 8 LTS to Candidate for Major Version*

**#4 - 2018-02-28 14:26 - Markus Klein**

- *Related to Bug #83580: GeneralUtility::xml2array() can't parse bigger files (> 10MB) added*

**#5 - 2020-03-24 08:40 - Susanne Moog**

- *Status changed from New to Closed*

Closing the umbrella, as we now have a category for this.

**#6 - 2020-10-09 09:52 - Alexander Nitsche**

- *Related to Story #92526: Concept for improved EXT:impexp added*

**#7 - 2020-10-09 09:52 - Alexander Nitsche**

- *Related to deleted (Story #92526: Concept for improved EXT:impexp)*
