<b>Target version:</b>			
<b>Description</b>			
<p>For some strange reason I was just logged in as "inshadow" in forge instead of "ingmars". I don't have any clue how that happened or how to reproduce it, I was definitely didn't do anything special.</p> <p>Step by step:</p> <ul style="list-style-type: none"><li>- I was already logged in to typo3.org</li><li>- I went to the v4 Core Team project on forge, then clicked on "Sign in" in forge</li><li>- various redirecting lead me straight to the forge start page, logged in as "inshadow"</li><li>- I only had the rights of the "inshadow" user instead of the rights of the "ingmars" user on forge</li><li>- I logged out of forge again and logged in with ingmars again, and now it worked correctly...</li></ul> <p>Lets see if this appears again...</p>
