[BUGFIX] Move all typo3temp files below typo3temp/var or assets

The introduction of typo3temp/var and typo3temp/assets missed essential changes.

- Files generated by tests
- Install Tool cleared wrong directory
- Some paths were only changed partially
- Some paths were changed to the public dir, but should in fact be private
- Some paths have been completely forgotten to be changed

Besides that, the introduction of new subfolder in typo3temp, we need to allow arbitrary number of subfolders and remove the limitation of two in GeneralUtility::writeFileToTypo3tempDir
