[TASK] Unify references for backend modules icons

Somehow on earth, regular (non-extbase) modules register their module icons via [labels][tabs_images][tab] when using addModule(). The icon is not related to the labels at all, and can be simplified.

All icons registered are available via the module configuration option "icon" and old formats are migrated automatically (with a deprecation warning), and always stored in an absolute format.

Using "icon" now in the available places makes it easier and is unified in ModuleLoader, FormEngine, EXT:about and the Module Menu.

Resolves: #72827

Releases: master
