Description			
The registration for the additionalAttributes argument was moved from constructor to \TYPO3\CMS\Fuild\Core\ViewHelper\AbstractTagBasedViewHelper::initializeArguments. We have to ensure that each instance of the abstract viewhelper calls its parent method to register the missing arguments.

[BUGFIX] Ensure arguments for instances of AbstractTagBasedViewHelper

The initialization of several arguments in AbstractTagBasedViewHelper was moved from constructor to initializeArguments function. This patch ensures that instances of that abstract class call the parent function to register all possible arguments.

Resolves: #73432

Releases: master
