Description

There is a possibility to override the newContentElementWizard by setting mod.newContentElementWizard.override. This is not working for the PageLayoutView. In this module the link is hard-coded to BackendUtility::getModuleUrl('new_content_element', \$urlParameters)

As a developer I would like to override this link as well so I can implement my own wizard for adding new content elements.

Associated revisions

Revision 38d730c5 - 2016-02-19 18:30 - Richard Haeser

[BUGFIX] Add missing new_content_element overrides in PageLayoutView

Add the missing override possibilities in PageLayoutView as introduced by issue #70055. Also add check if the override attribute of newContentElementWizard is set in the tsConfig array.
