

TYPO3 Core - Bug #73620

HTML-tags are visible in tables (Content)

2016-02-23 14:00 - Matthias Greiling

Status:	Closed	Start date:	2016-02-23

Description

Since 6.2.16 HTML-Tags in <table> were translated to <> so they are visible in the frontend.

Is this an intended behaviour?

Images with caption are wrapped with <table> - so nested tags like in <caption> are also visible.

History

- Status changed from New to Needs Feedback

You mean you see the HTML in the frontend? Yes, this is intended to improve security as this is basically XSS. Please head to the security bulletin: <https://typo3.org/teams/security/security-bulletins/typo3-core/typo3-core-sa-2015-013/>

This TS should revert to the old behaviour:

```
tt_content.table {
    20.innerStdWrap.parseFunc =< lib.parseFunc
    20.innerStdWrap.htmlSpecialChars >
}
```
