Description

sys_file_reference comes with the database field downloadname but it is not used or displayed anywhere and it even has no TCA definition.

It noticed that when I tried to use it with extbase but it was not persisted, because of the missing TCA definition.

We should either drop it or provide a TCA definition for it.

[!!!][TASK] Remove unused downloadname from sys_file_reference

The field sys_file_reference.downloadname was added with FAL but never touched or used (nor has it a TCA definition) and is now removed.
