Description			
Dear Fluid Team,			
When I was working on my company's project, I noticed it would be sweet if I can use <code>{\Vendor\Extension\Interface\SomeInterface::SOME_PARAMETER}</code> in the Fluid template directly rather than <code>\$this->assign()</code> .			
Attached is how I did, maybe it can be included in the core file. And, feel free to update the code if needed, more security is preferred :)			
Thank you for the great extension.			
Cheers, Bill			

History

#1 - 2016-03-29 08:06 - Bill Dagou

- Project changed from *TYPO3 Core* to *Fluid: Website Template*
- Category deleted (*Fluid*)

Attached is how I did, maybe it can be included in the core file. And, feel free to update the code if needed, more security is preferred :)

Thank you for the great extension.

Cheers,
Bill

BTW, my code is based on v7.6.4 .

Sorry, I think I messed up the project, please ignore this issue.
