[!!!][TASK] Make TYPO3\_CONF\_VARS[BE][lockSSL] boolean

The lockSSL setting has three possible values:

0 = do nothing when in the backend

1 = show a blank page when accessing the BE from non-SSL

2 = redirect to the https version of the BE

The option "1" is nowadays not a valuable option and "hiding" the TYPO3 Backend can be done via htaccess or other access rules.

Therefore the lockSSL setting only has a bool state now: \* When false do nothing \* When true, redirect to the SSL version of the BE

Resolves: #75357

Releases: master
