Description

If I change and save constants with the constant editor (e.g. `styles.content.textmedia.linkWrap.lightboxRelAttribute` or any other) by the following constants the "m" is cutting off.

```
styles.content.textmedia.linkWrap.width = 1140m
styles.content.textmedia.linkWrap.height = 600m
```

Best

Revision 60182c41 - 2016-05-29 10:11 - Wouter Wolters

[BUGFIX] Correct type for constants linkWrap height and width

The height and width have a default value with a "m" in it.
This is stripped of because the wrong data type is used. Use string instead to circumvent the automatic stripping of the letter "m".

History

#1 - 2016-04-18 22:29 - Riccardo De Contardi

I guess it is because of the comments inside Constants.txt:

```
# cat=content/cTextmedia/c1; type=int+; label= Click-enlarge Media Width: This specifies the width of the enlarged media element when click-enlarge is enabled
```

cat=content/cTextmedia/c2; type=int+; label= Click-enlarge Media Height: This specifies the height of the enlarged media element when click-enlarge is enabled
