Revision 06393839 - 2017-02-07 21:26 - Helmut Hummel

[FEATURE] Add new imageManipulation supporting multiple crop variants

This feature extends the image cropping tool in the backend so that editors can now not only select one crop area, but multiple ones per image.

Within the crop are now also a focus are can be selected and to preview areas that will be covered once the image is rendered in the frontend one or more cover areas can be configured to be shown inside the crop area.

This change also adds a format.json view helper and a view helper to generate backend URIs that are used in the now fully Fluid rendered imageManipulation element.

This is the TYPO3 integration part. TypeScript and CSS will be done in a second commit.

Revision 3b6d0a14 - 2017-02-09 03:52 - Frank Naegler

[BUGFIX] Add cropVariant support for broken GalleryProcessor

Since the ImageManipulation wizard supports multiple crop variants, the GalleryProcessor is broken. This patch add support for multiple crop variants in the GalleryProcessor and MediaViewHelper
