Description

Just updated from 6.2.15 to 6.2.22 and recognized i can not select any item from a rendered checkbox tree anymore.

When going back to 6.2.21 it works, so i suspect this change:

<https://review.typo3.org/47900>

This happens if a record has a checkbox/tree field and no element is selected, so i unselect a static "please choose" option and want to activate one checkbox from below (see screenshot)

The click has no effect.

Browser = Firefox/Ubuntu

Typo3 Version = 6.2

TCA for that field:

```
'sub_type' => array(
    'exclude' => 0,
    'label' => $ll.'property.subType',
    'config' => array(
        'type' => 'select',
        'items' => array(
            array(
                $ll.'property.subType.default',
                '0'
            )
        )
    ),
    'default' => 0,
    'foreign_table' => 'tx_ext_domain_model_subtype',
    'foreign_table_where' => 'AND tx_ext_domain_model_subtype.sys_language_uid IN (-1, 0) AND tx_ext_domain_model_subtype.type = ###REC_FIELD_type### ORDER BY tx_ext_domain_model_subtype.name ASC',
    'size' => 5,
    'autoSizeMax' => 10,
    'maxitems' => 1,
    'minitems' => 0,
    'renderMode' => 'tree',
    'treeConfig' => array(
        'parentField' => 'parent'
    )
),
'l10n_mode' => 'exclude',
'l10n_display' => 'defaultAsReadOnly'
),
```

Hi this is already reported under [#75947](#) and has already a pending patch. If possible, please test the according patch.

Thanks.
