

TYPO3 Core - Bug #76029

Regex in ExtensionManagementUtility::executePositionedStringInsertion is broken if you want to insert after a palette

2016-05-03 14:29 - Marco Huber

Description	
<pre>\TYPO3\CMS\Core\Utility\ExtensionManagementUtility::addToAllTCAtypes('pages', 'myfield', '', 'after:description');</pre>	
<p>The field "description" is part of the palette "metatags" so \$positionName in ExtensionManagementUtility::executePositionedStringInsertion() is "--palette--;;metatags". This is modified to "--palette--:[^]*;metatags" and then escaped with "preg_quote(\$positionName, '/')". And then the preg_replace doesn't work.</p> <p>\$positionName should be first quoted and then extended.</p> <p>This was introduced in https://forge.typo3.org/issues/75830.</p>
